

## Jordan Hansford Neuro-oncologist

### Adelaide, South Australia, Australia

Professor Jordan Hansford is the Program Leader in Paediatric Neuro-Oncology at SAHMRI and leads the neuro-oncology team at WCHN. Professor Hansford was recruited as the medical lead in proton integration team responsible for medical care and development of the Australian Bragg Centre for Proton Therapy and Research after nearly a decade at the Royal Children's Hospital Children's Cancer Centre. The ABC will bring the most advanced radiation treatment to Australia when it opens for patient treatment in 2025. Professor Hansford hails from Canada and is a clinical researcher with leading roles in a multitude of national and international studies. He has a long-standing interest in cancer genetics and has a keen interest in proton therapy, research, and the equity of care for young brain cancer patients.
